MUHAMMED FARIZ KP
Web Designer

As a web designer, I am passionate about creating visually appealing and user-friendly websites that enhance the user experience. Since I know about the internet, I am amazed by websites and other digital platforms. That's why I also create a personal website while learning more about web designing and its industry. I want to be a professional web designer someday. One of the ways to achieve my goal is by continuing my study at the university with a web designing program. I try to upgrade my knowledge and skill by following short courses on web designing and software and joining communities.
